

TASHFEEN RAZA

AI Engineer — GenAI & Production Systems

+92 307 5286602 | razatashfeen045@gmail.com | Islamabad, Pakistan

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI Engineer with hands-on experience building production-grade GenAI systems, LLM-powered applications, and intelligent automation workflows. Strong software engineering foundation with expertise in architecting RAG systems, designing conversational agents, and integrating AI into real business processes. Proven ability to deliver client-focused solutions from proof-of-concept to deployment.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript
GenAI & LLMs: LangChain, LangGraph, Prompt Engineering, RAG Architecture, Agent Frameworks
ML/DL Frameworks: PyTorch, TensorFlow, scikit-learn, OpenCV, Hugging Face
Vector Databases: Pinecone, ChromaDB, FAISS, Semantic Search
Backend & APIs: FastAPI, Flask, REST APIs, Microservices, OAuth 2.0
Software Engineering: Git, CI/CD, Testing, Code Review, Clean Code Principles, Documentation
Automation & Integration: n8n, Webhook APIs, Workflow Orchestration, B2B Integrations
Tools: Docker, NumPy, Pandas, Jupyter, Streamlit

EDUCATION

National University of Modern Languages (NUML) <i>Bachelor of Science in Artificial Intelligence</i>	Islamabad, Pakistan Feb 2022 – Jan 2026
--	--

EXPERIENCE

AI Engineer (Intern) <i>Neuronix Technology</i> - Building production computer vision systems for real-time workplace monitoring and safety compliance - Deploying object detection models optimized for low-latency inference with testing and monitoring pipelines	Mar 2026 – Present Islamabad, Pakistan
LLM Integration Engineer (Contract) <i>Dassoft (Siberkoza, NASTP)</i> - Architected LLM-based solutions for enterprise product, improving accuracy by 25% and reducing latency by 30% - Built production REST APIs and evaluation frameworks, collaborating with cross-functional teams	Oct 2025 – Dec 2025 Rawalpindi, Pakistan
AI/ML Intern <i>Siberkoza (Startup, NASTP)</i> - Developed RAG-based systems with vector databases for intelligent document processing and automation - Built ML classification models processing 100K+ entries daily with semantic search and hybrid retrieval	Jul 2025 – Aug 2025 Rawalpindi, Pakistan

PROJECTS

TechNova AI Receptionist – Multi-Agent GenAI System - Automating business communication by handling appointment scheduling, FAQ responses, and calendar management, reducing manual coordination time by 70% - Enabling cross-platform workflow automation connecting email, calendar, and messaging with intelligent routing	2025
Smart Extract – Intelligent Video Processing (Final Year Project) Automatically detecting and extracting critical incident clips (fires, accidents) from surveillance footage, reducing manual review by 85% and false alerts by 40%	2024-2025
Real-Time PPE Detection & Workplace Monitoring Improving workplace safety by monitoring PPE compliance and employee activity in real-time with instant violation alerts	2025
PhishGuard – AI-Powered Email Security Protecting users from phishing attacks by analyzing threat intelligence and providing risk scores with security recommendations	2025

CERTIFICATIONS

Machine Learning Specialization – Coursera (2024)
Generative AI with RAG & LangChain – Coursera (2024)
